

GATE 6 Solutions, Inc.

Expands its Government Contractor Services Division

GATE 6 Solutions, Inc. (GATE 6) is pleased to announce that it is expanding its Government Contractor Services Division to broaden its services being provided to government contractors. This Division includes 5 skilled resources that have recent direct national and international EOD and Munitions Response project experience. Each of them has demonstrated experience assisting clients with the many challenges that are inherent with Federal Government contracting. This experience covers a wide range of service areas that include the following:

- Performance Measurement and Earned Value Management (EVMS) [ANSI/EIA 748]
- Estimating, Scheduling, Cost Management, and Project Control [DOE Order/Manual 413.3]
- Change Management, Requests for Equitable Adjustment (REA), Claims & Dispute Resolution (DR)
- DCAA Audit Support and Cost Recovery and Impact Mitigation
- FAR, CAS, and other Government Regulations Compliance
- Accounting System Consulting, Implementation and Training
- Billings, Collections and Contract Closeout Processes
- Cost and Pricing Analysis and Request for Proposal (RFP) Preparation

The Government Contractor Services Division is headed up by **Mr. Bruce P. Bowland**. **Mr. Bowland** is fully supported by a team of focus-area leaders comprised of skilled professional resources with vast government experience, including **Mr. Frank Haseltine**, **Mr. Steven Beck**, **Mr. Steve Tourville**, and **Mr. Jim Rose**.

Mr. Bruce Bowland, former Director of Finance with EOD Technology, Inc. in Lenoir City, TN brings to **GATE 6** his 29 years of experience in federal government financial and business operations management, business and government job cost accounting, contract management, and benefits administration. **Mr. Bowland** is a well respected principal level finance professional with a proven record of accomplishment effectively leading companies through aggressive growth phases. He has counseled companies in their restructuring of business operations, implementing new accounting/finance systems, and integrating accounting with project management systems. **Mr. Bowland** is viewed as an

expert in marketing and contracting with the federal government, proposal development, negotiating and managing contracts, compliance with government procurement and accounting regulations, financial reporting to the government, the government audit process (DCAA, GAO and IRS), and with government compliant job cost and ERP accounting systems such as Deltek suite of financial management tools. He has been accepted in United States District Court as a technical expert and proffered testimony on the propriety of audits and admissibility of claimed costs and supporting audits of Federal Government contracts and subcontracts. **Mr. Bowland** earned a Bachelor of Science Degree in Geotechnical Engineering from the University of Rhode Island in Kingston, RI and a Master's in Business Administration Degree from Bristol University in Knoxville, TN.

Mr. Frank Haseltine, former Munitions Response Business Unit Operations Manager with EOD Technology, Inc. in Lenoir City, TN brings to **GATE 6** more than 30 years of broad based experience in federal government program/project management, business management and contract management. He is an accomplished Program Operations Manager with comprehensive experience in program management and the critical elements of project design, development, and execution. He offers extensive experience directing multi-million dollar munitions response, UXO/MEC clearance, environmental remediation, and construction projects for government and private sector clients, including

Department of Defense (DOD), Department of Energy (DOE), The U.S. Army Corps of Engineers (USACE), and Air Force Center for Environmental Excellence (AFCEE). **Mr. Haseltine** is adept at administering personnel and logistical functions of large-scale projects and programs including contract evaluation/negotiation/administration, cost/program control (fixed-price and cost-reimbursable contracts), risk management, supervising Project Managers, maximizing utilization of employee and asset skill sets, performing project reviews, and ensuring project completion on time, within budget, and in accordance with specifications and regulations. **Mr. Haseltine** understands the importance of customer satisfaction and is highly committed to maintaining strong client relations, quickly resolving issues, ensuring compliance with project specifications, and exceeding client expectations. In addition, **Mr. Haseltine** offers a distinguished military career as a Commander/Base Contracting Officer with the United States Air Force.

Mr. Steve Beck, former Operations Manager, Munitions Response and Project Control Manager with EOD Technology, Inc. (EODT) in Lenoir City, TN brings to **GATE 6** more than 16 years of federal government experience in project management, planning, cost and schedule control, earned value management, contract management and claims management. He has provided services to government contractors on complex projects for the DOD, DOE, USACE, NAVAC, and AFCEE. Recently **Mr. Beck** was responsible for the successful creation, development, training, and use of an integrated project controls system at EODT designed to comply with government earned value management guidelines using Primavera Project Manager, Success Estimator, and Deltek Costpoint ERP and job cost accounting tools.

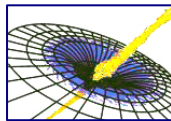

Mr. Steve Tourville, former Estimating Manager with EOD Technology, Inc. in Lenoir City, TN brings to **GATE 6** more than 18 years of broad based project management, cost engineering, project control, change management, and claims experience on complex projects for commercial and federal government contractors. He is recognized for providing high-caliber services for clients that would like to optimize efficiency while minimizing cost and schedule risks. Recently **Mr. Tourville** served as Principal Cost and Scheduling Engineer on DOE Mixed Oxide Fuel Fabrication Facility Project with duties that involved the oversight of resource-loaded schedules, baseline budgets, forecasts, actual expenditures and accruals, as well as preparation of monthly reports to include integrated performance reporting such as cost/schedule performance metrics, critical path analysis, variance analysis and corrective action plan development.

Mr. Jim Rose, a former Project Control Manager with Shaw Environmental and Infrastructure, Inc. on the DOE Mixed Oxide Fuel Fabrication Facility Project (MOX Project) brings to **GATE 6** more than 30 years of broad based commercial and government experience in project management, project controls, planning and scheduling, cost engineering, estimating, and contract administration. His project experience includes engineering, design, construction, commissioning, and operation of large complex facilities for the commercial nuclear and fossil power generation industry and for DOE including defense, waste management, and environmental restoration at the Savannah River, Idaho, Los Alamos, and Hanford Sites. **Mr. Rose** is recognized for his detailed insight and understanding of DOE requirements for Capital Budgeting; Program Planning; Resource Planning; Baseline Development, Risk Management, Change Management; Performance Measurement, Earned Value Management, and Management Auditing. He is also recognized for the configuration and implementation of an enterprise project management and earned value management system for SHAW AREVA MOX Services on the MOX Project to comply with DOE Order 413.3 and ANSI/EIA 748. He just recently completed the successful development, implementation, and training using Primavera Project Manager and Success Estimating for an international ordinance disposal, environmental, and security company located in Tennessee. These companies web based enterprise project management platforms now serve as the foundation for a distributed/globally enabled project management/project control system.
